### PR1: TEACHER'S MANUAL / FINALIZATION

**The manual consists of 4 different topics/sections, along with proposed informal activities that will drive teachers to develop interactive and hands-on activities in the classroom.**

First of all, **Themistoklis Private school** developed a questionnaire in order to identify the project's results. All partners shared and distributed the questionnaire to their countries and their organizations.

Secondly we created an online repository. **University of Vechtra** gave all the necessary guidelines to the rest of partners. After that the partners populated the repository and **AKNOW** updated the changes to the website. Subsequently, **Formative Footprint (FF)** defined the structure of the Teachers' manual with the contribution and validation of the rest of the partners.

After writing and creating Teachers' manual we organized an online meeting with the presence of experts in order to advise and give us some tips for the finalization of the manual.

Next step is **Mundus** to guide the development of the training material of the teachers' manual with the contribution of the other partners except **ATERMON**.

Last but not least will be the translation of the manual into partners' national language.
